Preface

This document contains installation instructions for the application MillionDoc. MillionDoc comes with two modules, namely MillionDoc Designer and MillionDoc End-User. The tools have to be installed separately. The order in which the tools have to be installed is not relevant.

For both tools a trial version zip file can be downloaded from the Consonant's website (<http://www.solutions.consonant.nl>). The tools come with a licence key and are available in zip file format. The installation procedure of the tools is easy and fairly similar.

The first part of the manual describes the installation of MillionDoc Designer and the second the installation of MillionDoc End-User.
